

Commercial Vehicle Engineering Capabilities

We have over 25 years' of design experience in Body In White (BIW), trim and chassis structures for cars and commercial vehicles. We offer full programme responsibility from programme definition and strategy through to styling, engineering and the management of production tooling.

Our capabilities in BIW and design include:

- Defining cab strategy and modularity concept
- Benchmarking and target setting
- Feasibility
- Prototype design
- Reliability and durability
- Aerodynamics CFD
- Interior airflow
- Safety development
- Prototype design
