

Vulnerability Disclosure Policy

Protecting our systems and data from security vulnerabilities is integral to what we do. We aim to identify and address any weaknesses that could allow an attacker to compromise the integrity, availability, or confidentiality of any HORIBA MIRA, (hereafter known as MIRA) device, service, or system.

Introduction

This vulnerability disclosure policy applies to any vulnerabilities you are considering reporting to us (MIRA). We recommend reading this vulnerability disclosure policy fully before you report a vulnerability and always acting in compliance with it. We value those who take the time and effort to report security vulnerabilities according to this policy. However, we do not offer monetary rewards for vulnerability disclosures.

Reporting

If you believe you have found a security vulnerability, please submit your report to us using the following link:

www.horiba-mira.com/enquiries

and select the Enquiry Type "Vulnerability Reporting"

In the Detail of Enquiry section please include details of:

- The website, IP or page where the vulnerability can be observed
- A brief description of the type of vulnerability, for example, "XSS vulnerability"
- Steps to reproduce. These should be a benign, non-destructive, proof of concept. This helps to ensure that the report can be triaged quickly and accurately. It also reduces the likelihood of duplicate reports, or malicious exploitation of some vulnerabilities, such as sub-domain takeovers

What to expect

After you have submitted your report, we will respond to your report within 5 working days and aim to triage your report within 10 working days. We'll also aim to keep you informed of our progress. Priority for remediation is assessed by looking at the impact, severity, and exploit complexity. Vulnerability reports might take some time to triage or address. You are

welcome to enquire on the status but should avoid doing so more than once every 14 days. This allows our teams to focus on the remediation.

We will notify you when the reported vulnerability is remediated, and you may be invited to confirm that the solution covers the vulnerability adequately.

Guidance

You must NOT:

- Break any applicable law or regulations
- Access unnecessary, excessive, or significant amounts of data
- Modify data in MIRA's systems or services
- Use high-intensity invasive or destructive scanning tools to find vulnerabilities
- Attempt or report any form of denial of service, for example, overwhelming a service with a high volume of requests

- Disrupt MIRA's services or systems
- Submit reports detailing non-exploitable vulnerabilities, or reports indicating that the services do not fully align with "best practice", for example missing security headers
- Submit reports detailing TLS configuration weaknesses, for example "weak" cipher suite support or the presence of TLS1.0 support
- Communicate any vulnerabilities or associated details other than by means described in this Policy
- Social engineer, 'phish' or physically attack MIRA's staff or infrastructure
- Demand financial compensation in order to disclose any vulnerabilities

Legalities

This policy is designed to be compatible with common vulnerability disclosure good practice. It does not give you permission to act in any manner that is inconsistent with the law, or which might cause MIRA or partner organisations to be in breach of any legal obligations. Thank you for helping keep MIRA and our data safe!

You must:

- Always comply with data protection rules and must not violate the privacy of MIRA's customers, staff, contractors, services, or systems. You must not, for example, share, redistribute or fail to properly secure data retrieved from the systems or services.
- Securely delete all data retrieved during your research as soon as it is no longer required or within 1 month of the vulnerability being resolved, whichever occurs first (or as otherwise required by data protection law).
